

WEIGHT LOSS

All programs include menus and weekly weigh ins

Peptides may or may not be available depending on FDA regulation. Please check with the MediSpa and Body Shop for availability.

Semaglutide Tirzepatide \$499 per month \$699 per month

A once-a-week simple and easy injection. The shots help with appetite, and also help stabilize blood sugar and metabolism.

How they work: decreases food intake, delays gastric emptying, reduces glucagon levels, increases insulin sensitivity, enhances first and second phase insulin secretion. This helps you feel full longer, so you consume fewer calories without feeling deprived.

How to get started

To find out if these medications are suitable for you it is as easy as 123.

Step 1 You must have current blood work panels, and there are specific panels that are needed. If you have current blood work panels call or text us and we'll take a look at what you have and see if it's what we need. If not, a blood work order can be given if you have insurance. Or you can have your blood drawn at the MediSpa, if you do not have insurance.

Step 2 After bloodwork panels are back, we will get you scheduled with an appointment to meet one with one of our nurse practitioners. Our nurse practitioners will go over the blood work with you and, if all is well, you can get started that same day.

Step 3 Three is maintenance; you take one shot weekly and that can be given at home or you can come in and receive it. Every three months you'll need to meet with the nurse practitioner again and in between you'll meet with one of our Weightloss Managers.

Basic Customized Plan \$175 per month

The secret to BodyShop MD Weight Loss and Wellness Center is our individualized plans, specifically catered to your needs and personal goals.

Olympia Weight Loss Kit \$425 per month

Uses a combination of Naltrexone, Sermorelin, Lipo-Trim SL and a low calorie intake to achieve optimum result. (you will be giving yourself daily injections). Price includes the kit and a nurse practitioner visit. Prescription appetite suppressants are available, if needed.

UnCraveRx Program \$799 per month

The UnCraveRx program includes sustained release Naltrexone pellet therapy, and an app that helps you create healthy habits through nutritional advice and lifestyle behavioral support, and personal health coaching.

Add Ons Skinny shot \$25

Increases liver function and helps your body metabolize fats quicker. Increases energy and mood!

The staff at Bodyshop MD Weight Loss and Wellness Center combine the most reliable weight loss practices today to provide you a unique weight loss regime.
